EDUCATION

B. Tech in Robotics and Automation
(2024)

Manakula Vinayagar Institute of Technology
CGPA: 9.50

HSC - 2019

Immaculate Heart of Mary Higher Secondary School

Percentage: 64%

SSLC - 2017

Immaculate Heart of Mary High School

Percentage: 82%

TECHNICAL SKILLS

Exceptional programming skills in Python and C, along with
OpenCV, ROS (Robot Operating System), Gazebo, and
Machine learning concepts

Proficient in designing Blue Prism, UI Path, UX
design, AutoCAD, SolidWorks and HTML

Demonstrates a strong command of modern
programming tools, including WPL software, and
LabVIEW software

ACHIEVEMENTS

Created 3 bots and get a badge from UIPATH
academy

Paper presentation in sri Venkateshwara
college of engineering

1st prize on IoT based project expo

PROFILE

Exceptional programming skills in Python and C, along with expertise in OpenCV, ROS (Robot Operating System), Gazebo, and machine learning concepts, empowering the development of advanced and intelligent applications.

Proficient in designing with a versatile skill set encompassing Blue Prism, UI Path, UX design, AutoCAD, and SolidWorks, ensuring the creation of visually stunning and user-centric experiences.

INTERNSHIP

TECHNICAL SUPPORTER

Cornerstone Engineering Solutions

Demonstrated technical process by successfully developing the outer panel and wire connections in Programmable Logic Controller (PLC).

Created a highly efficient and effective PLC program for an advanced car parking system, contributing to streamlined operations and enhanced user experience

PROJECTS

MAGNETIC TAPE FOLLOWING ROBOT

Implemented a sophisticated magnetic tape tracking system for precise navigation, utilizing sensor technology

Designed with a robust lifting mechanism, empowering the robot to effortlessly handle handling weighting up to 10 Kg.

AUTOMATIC WHEAT DRYING ROBOT

Integrated sustainable practices by using solar energy, enabling uninterrupted operation for an impressive 6-hour duration while prioritizing environmental conservation.

Engineered an advanced robotics solution for efficient wheat management ,handling,spreading,drying,picking,and storing operations.

AREA OF INTEREST

Modelling And Simulation
programming For Robotics.
Electronics devices and Circuits
